on your lighting bill with

Weka
LED lighting

Simply the brightest
and most efficient
LED lighting available

Made in Nelson, New Zealand

How can I reduce my lighting costs?

- By switching to the most efficient lighting on the market.
- By using bulbs that last 10-20 years!!
- By choosing lights that use your power to generate light, NOT HEAT!
- By fitting high quality light fittings, designed to last, which give out warm and comfortable light (similar to halogen lights but using 90% less power).
- Our LED lights can all be dimmed, and then last even longer!

Also perfect for your motor home or boat.

A world beating Kiwi design made in Nelson, New Zealand.

Switch to **Weka**

Weka LED Lighting is simply the best on the market, and it comes with a proven track record. With over 20 houses in the Nelson/Tasman area the chances are that you may already have seen it.

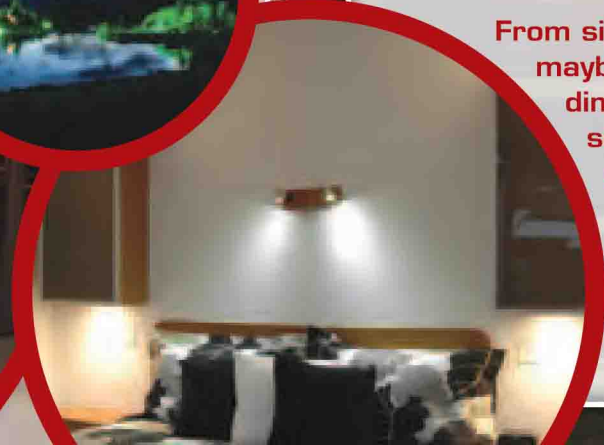

You can see **Weka** LED lights in the **Sachi Sushi Bar** on New St, the **Eco-friendly house** (featured on the Ecofest tour) on South St, the **Home Energy Centre** on Pascoe St, Tahunanui, Nelson and, as seen on television, New Zealand's most energy efficient house, **Little Greenie**, in Golden Bay. Also at the Glenuig Inn in Scotland!

Weka LED Lighting has cut their power bills, improved the quality and enhanced the style of their lighting.

Contact us for a FREE lighting plan tailored to light your space as you would wish it to be.

From simple lighting, maybe with optional dimming control, to sophisticated lighting controllers with mood lighting and ventilation control.

All the photos in this leaflet are from properties lit only by **Weka** LED Lighting.

Weka LED Lighting Product Selection
